

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of the Disclosure.

Please add the following new Abstract of the Disclosure:

A system that executes content like music and moving pictures, and protects rights like copyright, working on a configuration of a mobile information terminal and an external device is provided. A mobile information terminal acquires a right (ticket) to execute content. An external device of higher performance, compared with a mobile information terminal, executes content after receiving the ticket from a mobile information terminal. Though content and ticket can move freely in a system, once the content is executed, an identifier for identifying the mobile information terminal that demanded the execution of content is ~~liked~~ linked with the ticket. It is this mobile information terminal that can use the same ticket again.
